

VCTS VERTICAL CASE TRANSPORT SYSTEM

**Case
Printing Made
Easy**

Our Innovations Meet Your Needs

EZ-Tek's Vertical Case Transport System puts control back into the users' hands and offers the versatility, durability and productivity that you have come to rely on from EZ-Tek. The VCTS eliminates the need for pre-printed cases or expensive labeling equipment and supplies by allowing users to print directly on two sides of a case with a single pass. Adjustable width settings and printhead locations allow users to print on cases ranging in size from 10" x 10" up to 33" x 40".

Custom Case Printing Made Easy

Designed for off-line case printing, the VCTS automatically feeds blank cases through a print station that is ideal for mounting hi-resolution inkjet printers and offers the ability to print virtually anywhere on either side of the case. Open access to printheads allows for easy maintenance and quick adjustments. The VCTS also features an input hopper that can hold up to 90 flat single wall cases and can easily be reloaded by one person.

Easy To Program

The VCTS includes a programmable counter that keeps track of batch quantities, rate of operation, and elapsed run time, allowing users the ability to customize case runs. The system can be easily programmed to shut down when the maximum count is reached. The VCTS batch counter is the ideal solution for users looking to print a message on specific number of cases while eliminating the need for manual case counting.

Industrial Strength Operation

A single drive motor and an aggressive industrial strength drive belt make the VCTS a workhorse that will stand up to your toughest challenges. Each VCTS is made from 11 gauge steel that will withstand even the most rugged applications. A powder coated exterior protects from outside chemical damage guaranteeing years of use.

Increased Inventory Space

EZ-Tek's VCTS is an ideal option for users who are looking to increase storage space by eliminating pre-printed case inventories. Equipped with casters, the VCTS can be easily moved throughout the plant to accommodate your various printing needs.

Affordable Versatility

If you've wanted to begin printing your cases or expand your operations versatility, but felt your budget restricted you from doing so, EZ-Tek's VCTS offers a new level of economy. Eliminate the high costs associated with pre-printed cases by printing specific product information directly onto blank cases. Anyway you look at it, EZ-Tek's VCTS provides users with an affordable solution to meet your case printing needs.

The Right Solution

Rugged design. Proven reliability. Simple operation. Your benefits go on and on. When it comes to industrial operation, rely on EZ-Tek to provide the right solution for your case transport needs.

VCTS

VERTICAL CASE TRANSPORT SYSTEM

**Industrial strength drive belts
move boxes consistently through
at 72 feet per min.**

**Simple and rugged control
interface for easy operation.**

**Easy to load input hopper holds
up to 90 flat single wall cases
and can be loaded by a single
person.**

**Designed for use with Industrial Ink Jet Printers. Allows printing on all four
panels of the case.**

VCTS Features

- Plug-in and go operation
- Powder coated 10 gauge steel
- Industrial strength side belts
- Adjustable leg extensions
- Fast and easy box size changes
- Low maintenance
- Accommodates wide box size change
- Simple integration with ink jet printers

Vertical Case Transport Specifications

Machinery Makeup Industrial strength 11 gauge steel, powder coated for durability
Belt Speed 72 feet per minute (approx. 50 – 10" x 10" cases/min)
Input Hopper Capacity of up to 90 flat single wall cases
Input Hopper Adjustments 10" to 33" width, no tools required

Minimum Box Width (flat cases) 10"

Maximum Box Width (flat cases) 33"

Programmable Counter Designed for batch operations, rate metering, and elapse counting

Printing System Compatibility Designed for ink jet printing system compatibility

Casters Attached to each section for transport throughout the plant

Electrical Requirements 110 VAC, 60Hz, 4.0A

Air Requirements 80 PSI, 1/4" NPT Fitting

Vertical Case Transport Optional Accessories

Encoder Recommended for barcode printing

PZ Pilot Pro Printing System Hi-resolution printing system capable of printing bar codes, graphics and text
